HUCKLEBERRY

- Mineralization at Huckleberry can now be traced for over 3,000 m strike-length and 1,200 m down-dip as width increases from 9 meters at surface to 32 meters at depth.

SHOT ROCK

- Seabourne Resources, a wholly owned subsidiary of Northern Shield, is earning an interest into an exciting new epithermal gold project in of Nova Scotia with many similarities to gold deposits in Nevada.

NEW OPPORTUNITIES

- Northern Shield is in the process of acquiring further Ni-Cu-PGE assets as it applies its knowledge of the Labrador Trough to similar terrains in Canada and overseas.
